

Eunsu (Lucas) Kim

QLD, Australia | 0423 518 990 | [Email](#) | [Linkedin](#) | [GitHub](#) | [Portfolio Website](#)

Software engineer with experience in full-stack development, data analytics, and applied machine learning, including a first-place win at the Code Network Hackathon. Works with real, messy data and builds models that work reliably in real use. Looking for a role in software engineering, machine learning, or data and automation.

TECH SKILLS

- **Programming Languages:** Python | JavaScript | TypeScript
- **AI/ML:** Machine Learning | Deep Learning | Scikit-learn | Keras | TensorFlow | Pandas | NumPy | Matplotlib | Seaborn | Generative AI
- **Development:** API | HTML | CSS | React.js | Node.js | Rest APIs | OpenAI API | GitHub | SQL
- **Enterprise AI Solutions:** Microsoft Power Platform | AI Prompting | AI Automation

PROJECTS

Future Scope
Project Leader

Code Network Hackathon
Aug 2025

- Led idea collection, and brainstorming for a two-day hackathon; set up GitHub repo and React environment.
- Assigned roles by strength: frontend, backend, OpenAI prompting, and presentation preparation.
- Built responsive React UI for goal tracking and roadmap interaction.
- Learned and integrated the OpenAI API as a team to power AI-generated roadmaps.
- Built Node.js services with PostgreSQL-based user authentication and goal-tracking data storage.
- Cut non-essential features to fit the two-day limit and keep the demo clear for judges.
- Won 1st place at Code Network Hackathon; project featured in a QUT article.

Fruit Classification Model
Personal Project

Australia
Feb – May 2025

- Built a ResNet CNN model to classify apples, cherries, and tomatoes across 3 target categories.
- Sourced the image dataset from Kaggle and split them 80% train, 20% validation.
- Achieved approximately 90% classification accuracy on tomatoes due to distinct colour and shape features.
- Recorded a ~20% drop in accuracy for apples and cherries compared to the tomato baseline.
- Identified uniform 224x224 pixel resizing as the root cause, which removed key physical size differences between red cherries and red apples.

EXPERIENCE

Caravanserai
Customer Service Specialist

Brisbane, Australia

- Delivered front-of-house customer service at a restaurant.
- Analysed sales trends and data to recommend menu pricing and high-margin item promotions to management.
- Refined the website layout to improve customer navigation and engagement.

DynamX Institute
Power Platform Developer Intern

Gold Coast, Australia
Apr 2026 - May 2026

- Built an automated Power Platform environment to replace paper operations for small local library admins.
- Developed a Canvas App for kiosk tablets and a Model-Driven App for admins to track inventory and loans.
- Designed Power Automate flows for loan confirmations, due date tracking, and automated reminder emails.
- Built a Power Pages portal allowing members to browse the catalogue and submit loan requests remotely.
- Configured Dataverse as a centralised database to securely manage real-time library data and user transactions.

EDUCATION

Queensland University of Technology
Computer Science | CGI (Computer Generated Imagery)

Brisbane, Australia
Dec 2025

- Executive Deans' Commendation of Academic Excellence
- **Relevant Coursework:** Machine Learning | Data Analytics | Full-stack Development | Cloud Computing

Korea IT Academy
AI & Machine Learning

Online
Apr 2026 - Present

- **Relevant Coursework:** Python Programming | Machine Learning | Data Analytics | LLM | Computer Vision |

ACHIEVEMENTS

- Winner – 1st Place: Code Network Winter Hackathon Aug 2025
- Microsoft Certified: Power Platform Fundamentals May 2026
- Microsoft Certified: Azure Data Fundamentals Feb 2025
- Microsoft Certified: Azure AI Fundamentals Feb 2025
- **Academic Award:** Executive Deans' Commendation of Academic Excellence (QUT) Jun 2024
