PROFESSIONAL SUMMARY

Software Engineer with 1+ years of experience building web, cloud, and AI-powered applications. Passionate about AI integration, machine learning, deep learning, and building intelligent platforms that solve real-world problems. Currently developing Waylo, an AI-powered mobile platform that creates personalised roadmaps based on users' goals and skills.

SKILLS

- **Programming:** Python, JavaScript, TypeScript, C#, SQL
- **AI / ML:** Machine Learning, Deep Learning, PyTorch, TensorFlow, Scikit-learn, LLMs
- **Development:** React, React Native, Node.js, REST APIs, PostgreSQL, Git, Docker
- **Cloud:** AWS, EC2, ECS, Lambda, S3, DynamoDB, SQS, Auto Scaling, CloudFormation
- **Enterprise:** Microsoft Power Platform, Power Apps, Power Automate, Dataverse

EXPERIENCE

Waylo

Mobile App Developer | Personal Project

Brisbane, Australia

Aug 2026 - Present

- Developing an AI-powered mobile app that generates personalised roadmaps based on users' goals and skills.
- Building the app with React Native and TypeScript with daily, weekly and monthly planning.
- Integrating LLMs to analyse user goals and generate personalised tasks and recommendations.
- Designing a scalable architecture for AI-driven planning and intelligent assistant features.

DynamX Institute

Developer Intern

Gold Coast, Australia

Apr 2026 - May 2026

- Built a Power Platform solution to automate library inventory, loans, due dates, and reminder workflows.
- Developed Canvas and Model-Driven Apps for kiosk users and admins to manage inventory and loans.
- Built a Power Pages portal with Dataverse to support online loan requests and centralised data management.

Bionauts

Front-end Developer

Brisbane, Australia

Jun 2025 - Nov 2025

- Built a nature adventure booking platform using HTML, CSS, JavaScript, Bootstrap, and Node.js.
- Developed booking and photo-sharing features for teachers and students to manage and document adventures.
- Delivered user stories based on client requirements and managed project tasks using Monday.com.

AWS Auto-Scaling Video Transcoding Service

Cloud Architecture

Brisbane, Australia

Jun 2025 - Nov 2025

- Built a scalable AWS transcoding service using ECS, Lambda, S3, DynamoDB, SQS, and CloudFormation.
- Implemented SQS-based Auto Scaling across up to 3 ECS workers with DLQ failure handling.
- Reduced multi job transcoding time by ~61% through Auto Scaling compared with a single ECS worker.

Future Scope

Project Leader

Code Network Hackathon

Aug 2025

- Built an AI-powered roadmap generator using React, TypeScript, and the OpenAI API.
- Led a team by coordinating ideas and assigning roles across development, AI prompting, and pitching.
- Won 1st place at the Code Network Hackathon and was featured in a QUT article.

IIFP Pathology

Full-Stack Developer

Brisbane, Australia

Feb 2025 - Jun 2025

- Built a pathology insights web app using React, Node.js, and PostgreSQL to replace manual Excel workflows.
- Automated patient test report generation, allowing practitioners to focus on analysis.
- Implemented role-based data access to restrict patient records to assigned practitioners and patients.

Fruit Classification Model

Personal Project

Brisbane, Australia

Feb - May 2025

- Built a ResNet CNN model to classify apples, cherries, and tomatoes using a Kaggle image dataset.
- Achieved ~90% classification accuracy on tomatoes, with ~20% lower accuracy for apples and cherries.
- Identified image resizing as a key cause of low accuracy by removing physical size differences between classes.

Caravanseraï

Customer Service Specialist

Brisbane, Australia

- Delivered front of house customer service at a restaurant.
- Analysed sales trends and data to recommend menu pricing and high margin item promotions to management.
- Refined the website layout to improve customer navigation and engagement.

EDUCATION

Queensland University of Technology

Computer Science | CGI (Computer Generated Imagery)

Brisbane, Australia

Dec 2025

Korea IT Academy

AI & Machine Learning

Online

Apr 2026 - Present

ACHIEVEMENTS

Winner – 1st Place: Code Network Winter Hackathon

Aug 2025

Microsoft Certified: Power Platform Fundamentals

May 2026

Microsoft Certified: Azure Data Fundamentals

Feb 2025

Microsoft Certified: Azure AI Fundamentals

Feb 2025

Academic Award: Executive Deans’ Commendation of Academic Excellence (QUT)

Jun 2024

LANGUAGES

- English (fluent)
- Korean (native)
